DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 5 and 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claims recite a "read only random access memory". The phrase is confusing in that it implies a RAM and ROM combination of a memory device. Appropriate correction or clarification is recommended.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 10 recites the limitation "the logical partitioned data processing system" in line 20.

There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Art Unit: 2113

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 19, 20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The preamble of the respective claims recite "A computer program product in a computer readable medium...". In compliance with the rule, this should read "A computer-readable medium containing computer-readable instructions, which are executable..." or close derivation thereof.

Allowable Subject Matter

4. Claims 1-4, 6-9, 11-14, 16-18 are allowed.

5. The following is an examiner's statement of reasons for allowance: When read as a whole, claims 1, 7, 9, 11, 17 are allowable with respect to the following limitations:

As per claim 1, the primary reason for allowance is the limitation of storing an identification of the failed components, wherein the identification is used by each partition during a boot process.

As per claim 7, the primary reason for allowance is the limitation of failing the booting of the partition in response to the component being identified within the memory.

As per claim 9, the primary reason for allowance is the limitation to store an identification of the failed components in which the identification is used by each partition during a boot process.

As per claim 11, the primary reason for allowance is the limitation of storing means for storing an identification

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: See attached PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher S. McCarthy whose telephone number is (703)305-7599. The examiner can normally be reached on M-F, 8 - 4:30.
